

Meet Truzo: The Future of Drug Discount Management

The first end-to-end drug discount platform for proactive compliance

The complexities of managing drug discounts, combined with fragmented data and outdated processes, often result in lack of visibility and difficulty ensuring compliance. Truzo brings an end to these inefficiencies by establishing a direct connection between pharmaceutical manufacturers and covered entities (CE), delivering transparency, compliance, and faster payments—all on one platform.

OUR END-TO-END DRUG DISCOUNT PLATFORM

HOW IT WORKS

A simplified process for Manufacturers

- 01 Drug Purchase**
Covered entities purchase drugs at the wholesale acquisition cost (WAC) through wholesalers.
- 02 Claim Submission**
Covered entities submit claims directly through Truzo's platform using existing data streams.
- 03 Claim Review**
Truzo organizes claims data into easy-to-review formats, allowing manufacturers to quickly validate eligibility.
- 04 Payment**
Eligible rebates are processed and paid directly to covered entities on a weekly basis.
- 05 Ongoing Monitoring**
Monitor rebate statuses and analyze compliance trends through a unified dashboard.

SCALABLE SOLUTIONS FOR MANUFACTURERS

In a time of increasing complexity, managing drug discount programs in one place and in a technology-driven way is critical. Truzo is a platform for the overlap of all programs: 340B, MDRP, IRA's Max Fair Price, and Commercial. Effectuate 340B via a direct discount model, plan for the future with a purpose-built IRA Max Fair Price solution, ensure compliance as these programs overlap with MDRP and commercial programs, and easily resolve disputes -- all within Truzo.

About Kalderos: Kalderos is a technology company helping healthcare providers and manufacturers navigate the increasing complexity of the drug discount ecosystem by bringing the key stakeholders to the table to foster collaboration, build trust, and improve transparency and accountability. With Truzo – the first direct discount management platform – we are illuminating the path to a better system with a technology solution that promises to enhance compliance and visibility for stakeholders.

Truzo delivers unique value to drug manufacturers

Single Source of Truth

Truzo puts an end to disparate and fragmented data. With a single source of truth for all claims, stakeholders can manage drug discounts with confidence and clarity and have a detailed data ledger.

Simplified Proactive Compliance

Compliance is built into the intelligence of Truzo. By ingesting and matching identifiers down to the claims level, Truzo eliminates the need for retroactive chargeback data, ensuring every eligible claim is paid, and preventing duplicate discounts in real-time.

One Platform for All

Built to be configurable, Truzo's logic ensures compliance with other government drug discount programs, including Medicaid Drug Rebate Program and Inflation Reduction Act Maximum Fair Price.

Faster Rebates

With Truzo, manufacturers pay rebates directly to covered entities, so that covered entities get paid faster and have full control of the rebate dollars.

Secure and Sustainable

Truzo is committed to the data security and privacy of its users with enterprise-grade certifications and no PHI data exchanged. Our platform keeps user data secure while seamlessly integrating into existing systems.
